

It's elemental..

Xenemetrix
The Power to Change Energy Into Information

Issue 2
April 2013

Thank you for visiting us at Pittcon 2013: We would like to thank all our guests and partners who visited us on Pittcon 2013 in Philadelphia.

Pittcon 2013 was a successful platform for announcing Xenemetrix's latest solutions and innovations, and showcasing our expanding portfolio of analytical solutions, all available under one roof. We look forward to seeing you again soon, so that we can tailor the most suitable and appropriate solution for your elemental analysis needs.

Yours,
Xenemetrix Team

Keep in Touch..

Solution Highlight

Xenemetrix is proud to introduce: Ultra Low Sulfur in Air

We are proud to announce that we have reached the ultimate capability of complying with the Ultra Low Sulfur (ULS) directive ASTM D4294-10 concentration levels of Sulfur without the need for Helium purge- operating solely in regular air environment.

All our systems, including: S-Mobile SDD ULS, X-Calibur SDD ULS & X-Cite SDD ULS are now supporting this capability, and based on this unique application we have released the mobile laboratories from using and having to carry the cylinders for ULS application.

With just few minutes of acquisition time, we can reach less than 2ppm Minimum Detection Limit, while quantification starts from 10ppm level

For more information contact us at:

As part of our ongoing development of highly innovative technologies and solutions we are pleased to announce the release of our new web-based Applications Search engine for partners, which provides the best tool for pre-sales processes and application support, granting instant access to a large database containing over 400 application reports in a wide range of industries

This engine is now fully embedded into our website platform, enabling access and retrieval of applications online, anytime and anywhere. Search by keywords, Elements of Interest (EOI's), system types and more:

We proudly present our new and most updated social networking activity on LinkedIn and Facebook. Both social networks operate as an additional platform for updating existing or potential clients about our latest product innovations and improvements, upcoming events and news. We would like to welcome you to join us on LinkedIn and Facebook to keep in touch with us, get up-to-date information, and share your ideas, activities and events:

LinkedIn: www.linkedin.com/company/xenemetrix-ltd.

Facebook: www.facebook.com/Xenemetrix

Coming Next: The unbelievable new elemental analysis range: Carbon (6) - Fermium (100) & Petro-Marine system news.

Xenemetrix
The Power to Change Energy Into Information

Xenemetrix is a leading designer, manufacturer and marketer of Energy-Dispersive X-Ray Fluorescence (EDXRF) systems. With more than 30 years experience, Xenemetrix continues to develop highly innovative technologies and solutions suitable for

today's ever-growing analytical challenges. Xenemetrix combines the latest technological developments with innovative engineering, to provide cost-effective solutions to a wide range of industries and applications.
